BCS PARTNERSHIP BEGAN

THE PARTNERSHIP

William Newton Hospital has a heritage of excellence in patient care. Their strength is providing personalized, compassionate patient care. William Newton Hospital implements the latest in medical technology including its state-of-the-art facility equipment. As a non-for-profit community hospital, they need long-lasting equipment that will keep the hospital running as efficiently as possible with easy maintenance. BCS been a partner of Willam Newton for their facility needs since 1989. The facility is made up of Siemens direct digital controls, tying together high-quality mechanical equipment for easy monitoring and management. Fire and life safety systems are in place to maintain patient comfort and staff peace of mind.

BCS has been a strategic facility partner for William Newton Memorial Hospital for many years providing solutions and innovations to assist in the hospitals stewardship of resources. Together, we've created comfortable, individually controlled spaces vital to their healthcare services. BCS continues to execute technical support, system testing and staff training. This ensures that each system is working as it should to support its occupants and that the facility team is controlling all equipment as efficiently as possible.
